

AMAZING WATER – To go with MAZE TEMPLATE
Project WET activity - Page 219

Instructions for using maze template.

MATERIALS:

Copies of Amazing Water Maze (Card stock works best)
Laminate or plastic document sleeves
White tub caulking
Wax paper
3 –ring binder – optional

Supplies for activity

Food coloring
Table salt
Pepper
Vegetable oil
Eye droppers
Paper towel
Cup of water

You can run copies of the Amazing Water Maze on card stock paper.

You can then either laminate or insert into plastic slide sleeves.

After lamination or putting in plastic sleeves use a line of tub caulking following the black lines of the maze.

Let dry.

Put wax paper between sheets (This is a must!! Otherwise they will stick together and the caulking will pull off.)

If using slide sleeves you can store in a 3-ring binder.

Have a paper towel with each maze for participants to use for the overflow part
And then to clean up the maze when complete.

Follow directions in the activity guide for this activity.
TWO drops of water works best.

These can be used over and over and are inexpensive to make.

You can design up your own maze if you wish.
